Thanks Rich for drafting this. It looks good to me. I had one substantive addition and one editorial change.

Victor – let me know if you have any comments or concerns regarding this message to the Daily Interlake?

Rich - do you know who I should send this to?

Rob

I ~~wanted~~ would like to clarify one point made in Frank Hanson's June 21 letter regarding "taxpayer funds" and the ongoing investigation of contamination at the Columbia Falls Aluminum site. EPA's Superfund program focuses on holding responsible parties accountable for the financial resources associated with any investigation and cleanup actions necessary to protect human health and the environment. While EPA and the Montana DEQ continue to investigate potential cleanup needs and are working with the community to get feedback on next steps, current discussions do not involve the use of taxpayer resources.
